First Anniversary For Honors Tutorial College

After one year of existence, the Honors Tutorial College at Ohio University is alive, well and growing. And it remains unique—the only degree-granting program in the U.S. modeled closely on the Oxford-Cambridge tutorial system.

Last fall, 35 students with SAT (college entrance) scores of from 1220-1580—compared with the average freshman score of 924—formed the first tutorial group. Twenty-eight of these are still in the program and were joined in September by 50 new enrollees.

One of the HTC freshmen is Robert Faires, who graduated from Ohio University in 1939, a Phi Beta Kappa major in physics, and went on to earn a master's degree from Duke University.

Asked why he is starting over in mathematics, Faires said his 32-year career as a research physicist had left him with "whole sets of problems and questions" he wanted to explore:

"When family responsibilities brought me back to Southeastern Ohio, I looked over what the University had to offer that could occupy my mind and help me work on those problems. I was impressed with what I read about the Honors Tutorial College, and here I am.

"So far it has been stimulating. The other students I've met are delightful and could reinforce anyone's faith in young people."

Another math major is, at 13, the college's youngest student.

In addition to mathematics, 12 departments participate in the HTC program: botany, chemistry, chemical engineering, economics, English, government, history, mechanical engineering, philosophy, physics, psychology and social work.

The most popular areas of study, as reflected both among present students and applicants for 1975, are mathematics and pre-law. Four departments—economics, government, history and philosophy—offer special pre-law programs for HTC students.

Last year about one in 10 of the college's enrollees came from outside Ohio. Now about half are from out of state, and Dr. Margaret Cohn, assistant director of HTC, believes the increase is due to the program of achievement scholarships the University instituted prior to fall quarter.

Awarded on the basis of proven academic success, the scholarships pay half the out-of-state surcharge or the \$309 instructional fee for Ohio residents.

Debbie Skafar, whose home is near Pittsburgh, was among the first group of HTC students and, as is true of many of the out-of-state students, had been accepted by a prestigious university in her home state before learning of the Honors Tutorial College and its programs.

Thus far Ms. Skafar has no regrets about changing her plans and coming to Athens and HTC:

"I'm getting much more than would be possible in a regular academic program, even one with independent study options and honors sections," she said.

"I've had excellent tutors, have avoided a lot of red tape, and have sat in on upper division courses in chemistry, my major field. Right now I'm excited about sitting in next quarter on a graduate course in plant biophysical chemistry.

"I particularly like the idea of getting my degree in three years and knowing I'll be prepared to handle graduate study."

Most HTC students will graduate within three years, but the individualized programs and accelerated pace the tutorial system makes possible will enable some to graduate in two years or less. One student who entered the program as a freshman last year, for example, will move on to Ph.D. work in mathematics spring quarter.

Dr. Laurence Bartlett, a tutor in English literature who was educated in British universities, believes Ohio University has successfully transplanted the "Oxbridge" idea:

"My scheduled one-hour tutorial sessions invariably

Robert Faires '39 and other Honors Tutorial College students in a math seminar.

last two hours," he said, "and I know that by the end of a year of such meetings we will be tired of each other and all too familiar with each other's jokes. But I also know we will be convinced of the value of the process."

These one-to-one tutorials are the heart of the HTC program and spell hard work for both student and tutor.

The usual practice is for the tutor to outline a topic or set of problems for the student to research and write on during the week. The day before the tutorial the student hands in the written results of the research, in a paper which may range from five to well over 20 pages.

At the session, tutor and student discuss strengths and weaknesses in the research and in the student's presentation of his findings. The tutor brings in additional materials and suggests other approaches to the topic. He is also available throughout the week to answer questions and help with problems as they arise.

Departmental comprehensive examinations are given only when both tutor and student are confident the student is prepared for them.

Honors tutorial students also attend lectures and seminars and do laboratory work in the sciences. They participate as well in conventional classes in various disciplines as required by the individual departments and set forth in the program mapped out by the student and his departmental director of studies.

Since as freshmen and sophomores HTC students are required to stay in University housing, most have chosen to live in Fenzel House on the South Green and have found living together a congenial experience.

Many share an interest in working with computers, many enjoy chess or Risk, many are comic book devotees, a large number are active participants in both music and sports, and at least two have expressed presidential ambitions.

Richard Luken, a freshman English major from Cincinnati and a member of the University's soccer squad, indicates that HTC has lived up to his expectations and kept him hard at work:

"For the student who knows what he wants and can take full responsibility for his own success or failure, it is the best possible program," he noted.

Richard Luken and his English tutor, Dr. Laurence Bartlett.

Luken's comment about the need for commitment is reaffirmed by Dr. Cohn, as she discusses reasons why some students have dropped out of the program:

"Some simply found choosing a major field immediately after high school did not work out.

"Others found it possible to glide through high school without doing much work and had trouble handling the self-discipline and strong motivation the tutorial program demands," she added. "And then a few were thrown off stride by finding themselves just one among more than 80 very bright individuals."

The positive comments from both students and tutors are the best measure of the program's success, a success evident also in the increasing number of applicants and the favorable attention the college is receiving.

An example of this is the fact that HTC was singled out by an accreditation team from the North Central Association as "a significant academic innovation." The team's report also noted the solid support the new program had received from both the faculty and the administration.

In addition to the normal University funding, the Honors Tutorial College has gained a modest measure of financial support from outside sources. Both this year and last the Mead Corporation has provided a number of scholarships for Ohio students enrolled in the program. In addition, Miss Donna J. Jenks, an alumna, has allotted a part of her Trustees Academy membership to assist HTC.

Alumni wishing to know more about the college and the achievement scholarships should write: Ellery Golos, Director, Honors Tutorial College, Ohio University.

OHIO UNIVERSITY Alumni Journal

JANUARY-FEBRUARY 1975, VOL. 6, NO. 3

The OHIO UNIVERSITY ALUMNI JOURNAL is published by the Ohio University Development/Alumni Office, Jack G. Ellis, '57, *Director of Development*; J. David Scott, '59, *Director of Alumni Affairs*. Produced by the Office of Public Information. Sent six times a year to alumni contributing \$10 or more annually, to members of the Trustees' Academy, and to graduates for one year following graduation. Two issues—January-February and September-October—sent to all alumni.

BOARD OF DIRECTORS of the Ohio University Alumni Association: Wilfred R. Konneker, '43, *President*; Arthur E. Aspen-gren, '55, MA '56, *Vice President*; James Shipman, '51, *Secretary*; J. David Scott, '59, MEd '60, *Director of Alumni Affairs*; Wallace J. Hodes, '43, *ex officio*; Frank Bowers, '57; Richard H. Brown, '69; William J. Butler, '69; Mrs. Kent Chapman, '49; Patrick Cosiano, '59; Kenneth J. Ehrlich, '64; B. T. Grover, Jr., '50; William Hill, '63; John M. Jones, '49; Mrs. June LeLong, '42; John N. Meeks, '54; Raymond Metz, '62; Earle Phillips Jr., '48; Roger Scott, '52; Sanford Slavin, '47; Alan Weinberg, '64.

Ohio University Update

President Harry B. Crewson reaffirmed his commitment to maintaining the Freshman Residential Program throughout the year despite some student protest over the visitation restrictions in freshman dormitories. The residential program was initiated this fall and offers freshmen special services and opportunities including more academic counseling, special workshops, tutoring services and opportunities for leadership within freshmen-designed study and recreational programs.

The restricted visitation hours, one part of the total program, were included to assure the first year students some degree of privacy and absence of intrusion. Freshman halls visitation hours are from noon to midnight Sunday through Thursday and noon to 3 a.m. on Fridays and Saturdays.

Dissent aimed at the visitation restrictions led to a Thursday after-midnight sit-in by over 300 students, including upperclassmen as well as freshmen. Crewson refused to alter the hours pending a year-end evaluation of its effects on grades and individual adjustment of students.

* * * * *

In late December, C. Paul Stocker '26, a trustee of the University from 1958 to 1974, and his wife, Beth Kilpatrick Stocker '28, endowed a scholarship fund which will benefit students in the College of Engineering and Technology and the College of Arts and Sciences.

The annual dividends from the endowment will provide scholarship aid to freshmen and sophomores majoring in engineering, or hard science areas.

The scholarship is the latest in a long list of gifts made by the Stockers to Ohio University. These include membership in the Trustees Academy, departmental gifts, an endowed scholarship and a 1973 gift of \$100,000.

* * * * *

A room and board fee hike to cover inflation and increased operating costs was approved by the Board of Trustees at their January meeting. The five per cent increase amounts to \$75 a year and is expected to cover about half the actual cost increases which involve higher utility rates and food prices plus a wage and benefits raise for classified employees as mandated by the General Assembly. The other half of the cost increase hopefully can be borne by the University through increased efficiency of operation.

The trustees also heard a report of a vote by faculty members indicating a majority were interested in establishing collective bargaining with the University. The balloting was done only to determine interest and did not include options on potential bargaining agents.

Preparing a budget for 1975-76 has become quite a challenge this year because of several unknown factors. First there is a new governor, Republican James Rhodes, who will not present his budget proposals — including one for higher education — until March. When he does, he will be presenting them to a new legislature which was seated in January and which is to consider a change in the subsidy rate as recommended by the Board of Regents. Since it is hard to predict at this point what level of state aid might be forthcoming for the next biennium, the University Budget Advisory Committee is having to formulate a plan without an accurate figure on which to project income. So far the budget discussions have presumed enrollments ranging from a conservative minimum of 12,200 and upward.

* * * * *

William A. Lavelle, former Ohio Democratic Party chairman and Athens attorney, was named to the Ohio Board of Trustees in January to become the first local representative to that board in many years. He will complete the term of William Kircher, who resigned to accept a comparable post at the University of Cincinnati.

A 1949 graduate of the University's College of Business Administration, Lavelle received his law degree from Ohio State University, and returned to Athens to enter into practice with Joseph B. Yanity. Their firm, which now has six attorneys, is the largest in Southeastern Ohio.

Lavelle currently serves on the Ohio Democratic Party Executive Committee, is chairman of the State Central Committee and is on the Democratic National Committee.

His wife, the former Marion Yanity, is a 1952 graduate of the University, and all of his brothers and sisters are former students. His mother, Belle, is a 1915 graduate and was the University's Honorary Mother of the Year in 1951. His father, the late Francis A. Lavelle, also attended here and was Honorary Father of the Year in 1955. One of Lavelle's sons is currently an undergraduate at the University.

* * * * *

As *The Alumni Journal* went to press, a subcommittee of the Board of Trustees still had three names under consideration for the University presidency. The three candidates were selected by the Presidential Advisory Search Committee made up of representatives from all the University's constituencies. A new president is expected to be named in the next few weeks.

Six Join Trustees Academy

The membership roster of the Trustees Academy, the University's major gift society, has been increased to a total of 170 with the addition in recent weeks of six new members. Of these, two wish to be listed as anonymous donors.

Glen M. Bauer, the owner of the University Volkswagen dealership in Athens, has made an in-kind gift to the University's Driver Education Program through the annual donation of automobiles for the program's use. Bauer, a native of Columbus, is president of the Athens County Automobile Dealer Association. He and his wife, Shirley, have five children: Glen Jr., Lean, Julie, Bob and Guy.

Lawrence and Theresa Berberick have restricted their membership to use by the Athletic Department. Berberick is director of operations and co-owner of Pizza Hut of Ohio, Inc. He attended St. Benedict's College and is a graduate of Washburn University in Topeka, Kansas. Both he and his wife are native Kansans. They are the parents of a daughter, Julie Ann, and three sons: Neal, David and Donald.

David and Kathleen Gierhart, both alumni, have divided their gift between the women's retailing unit of the School of Home Economics and women's athletics. Gierhart '65 is the owner of The Pant Tree in Athens and previously worked for the University's placement bureau. Mrs. Gierhart (Kathleen Bickford '66) majored in communications and is a freelance writer. The Gierharts have two sons, Bradley Neal and John Wesley.

Gary and Patricia Meyer have directed that their gift be restricted to the Athletic Department. Meyer is a graduate of Highland Junior College and attended Washburn University and Ohio University. He is director of development and co-owner of Pizza Hut of Ohio, Inc. Both Mr. and Mrs. Meyer are natives of Kansas and have resided in Athens nine years. They are active in numerous community organizations and are the parents of two boys, Allen and Tim.

Election to the Trustees Academy is contingent upon a minimum membership pledge: A \$10,000 cash gift or pledge of that amount to be paid in \$1,000 annual amounts within 10 years or, alternatively, a deferred gift of at least \$25,000 given through a bequest, life insurance policy, life income or life irrevocable trust.

Please Excuse!

Names of the following alumni were omitted from the *Annual Giving Report* sent with the September-October *Journal*.

Jacob Lindley Society (gifts of \$250-\$499)

Mr. and Mrs. Elmer D. West '30
(Dorothy Lois Barton '31)

Cutler Society (gifts of \$100-\$249)

Mr. and Mrs. Robert C. Babbitt '63
(Rebecca Ann Gebhart '64)

Dr. James E. Goddard Jr. '54
Wilbur H. Lewis '61

Mr. and Mrs. Clifton L. McMahn '53
(Donna Jane Haught '69)

John N. Meeks '54
Neil J. Sharkey '43

Alumni Honor Roll (the number in parentheses indicates the number of years an alumnus has contributed since graduating or since the base record year, 1946)

Class of 1951

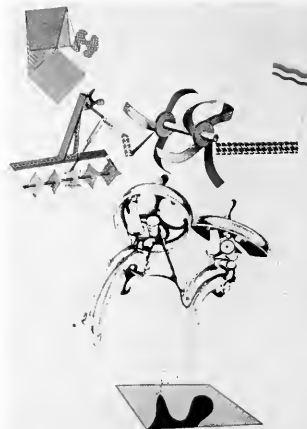

David J. Jones (2)

Class of 1964

Mr. and Mrs. Eugene F. Dunham Jr. (8)

Class of 1968

Donna J. Taylor (3)

Gallery Gift

The University's Trisolini Gallery had received a gift of a suite of Jim Dine prints entitled "A Tool Box" from the Chicago investment firm of Arthur Andersen and Co., Inc.

The idea for the donation came when Warren Cecil '43, a partner in the firm, learned from an *Alumni Journal* article that Dine, who is recognized both in the U.S. and abroad as a major contemporary artist, had graduated from OU in 1957.

According to Abner Jonas, chairman of the printmaking area within the School of Art, "A Tool Box" complements and predates two other sets of prints received from the artist himself: the 1968 book and print portfolio, "A Portrait of Dorian Gray," and the 1970 portfolio, "Etchings and Photographs," on which Dine collaborated with photographer Lee Friedlander. The three groups of prints comprise a significant collection of Dine's graphic work.

The 12 prints plus frontispiece of "A Tool Box" were published in 1966 by Editions Aleo of London and printed by Christopher Prater at the Kelpa Press.

Professor Jonas notes that the prints combine photographic images, collage elements and personal iconography and are characterized by simplicity and directness. The Gallery will exhibit them this spring.

at a glance . . .

A Summer Place

Alumni who are members of organizations seeking sites for summer conferences and workshops should keep their alma mater in mind.

The Athens campus offers a variety of meeting, dining, living and recreational facilities for groups of many sizes and diverse needs. Last summer over 6,000 participated in special programs in such areas as music, sports, geology, environmental problems, industrial audiology and career goals for women.

More detailed information may be had by writing to the Office of Workshops, 301 Tupper Hall, Ohio University, Athens, Ohio 45701.

Older/Wiser

In the first year of a program for senior citizens established by the Office of Continuing Education, there were 103 registrations. The program enables any person 62 or older to take credit and noncredit courses for a one-time processing fee of \$5.

The first participants ranged in age from 62 to 84 and enrolled for courses ranging from weaving to calculus. The majority of the courses were taken at the Belmont County, Chillicothe, Lancaster, Portsmouth and Zanesville branches, with 17 registrations at the main campus.

Past Issues

The staff of the Ohio University Archives are attempting to microfilm a complete set of early student newspapers. Especially needed are issues of the *Green and White* before 1930. Any copies which alumni would like to keep would be returned after filming. Also needed are donations of materials such as scrapbooks, programs and photos. Alumni having such materials are asked to write or call Bob McDonnell, Alden Library, Athens, Ohio 45701.

Transcripts & Records

In the past, alumni have often asked friends still on campus or in Athens to pick up transcripts for them at the Office of Student Records. But because of the recently passed Family Educational Rights and Privacy Act and the Buckley Amendment, such "secondhand" requests must now be accompanied by a signed release from the transcript's owner.

The Alumni Records Office will continue to release "directory information" — such as names, addresses, degrees earned, class year and honors received — for which no consent is required.

Back to Semesters?

Discussion of a possible return to the semester system got underway on campus following authorization of the option by the Board of Regents in late December. If implemented, the change would not occur before the 1976-77 academic year in order to permit sufficient time for planning and reorganization of courses and administrative records.

The University has been on the quarter system since 1967.

Mini-Internships

Fourteen student members of the University's chapter of Women in Communications, Inc. (WICI) participated in a unique program of mini-internships over the Christmas break. Paired with WICI professionals, the students gained a week of on-the-job experience with news services, school systems, television stations and advertising agencies in Toledo, Cincinnati and Columbus.

Alumnae involved were Judith Reed '72, reporter for the *Toledo Blade*; Beryl Rothschild '51, University Heights councilwoman; and Linnea Lose '68, school-community relations director for the Norwood Public Schools.

Business Drive Excels

Ohio University's 1974 Athens Business Drive exceeded its goal by \$9,000, reaching a final total of \$93,000. Since 1946 the annual area campaign has raised approximately \$900,000 to assist University programs.

The 1974 drive focused on three projects which can benefit both the University and the community: men's and women's athletics, admissions and recruitment, and attraction of conferences and workshops. Chairman for the campaign was Dr. Thomas H. Littler '51; vice chairman was Anse Cates '67.

Acronyms Arrive

Computer Assisted Renewal Education (CARE) has come to Southeastern Ohio. A mobile Computer Assisted Instruction (CAI) laboratory which provides a complete learning environment will be on campus from Feb. 10-March 21 and at Meigs High School from March 24-May 2.

Whenever their schedules permit, school personnel and others will be able to work on four CARE courses designed to train students to diagnose strengths and weaknesses in both normal and handicapped children.

CARE is sponsored by the College of Education Teacher Corps and the Extension Division, in cooperation with Penn State and the Bureau of Education for the Handicapped, U.S. Office of Education.

OU Friend Dies

George H. Pringle, who played a significant role in the development of the University's Chillicothe campus, died Nov. 14 at his home in that city.

President of the Mead Paper Corp. from 1963 until his retirement in 1968, Pringle had served as vice president of the OU-C Development Fund, president of the OU-C Advisory Board and as a member of the board of visitors to the College of Engineering and Technology.

Alumni Serve in Ohio Legislature

A number of men who attended Ohio University are among the 132 members of the 111th Ohio General Assembly, which began its work in January:

Vernal G. Riffe Jr., Speaker of the House, has represented the 89th District since 1959. He is shown above at last fall's Alumni Association banquet, at which he received the association's certificate of merit. On his left are President Harry B. Crewson and Wilfred R. Konneker, president of the Alumni Board. Riffe, a Democrat, is president of Sherman, Riffe and Bennett Insurance agency in New Boston. He has served on numerous House committees and been named Legislator of the Year by both the Disabled American Veterans and the League of Ohio Sportsmen.

Ball

Betts

Claire M. Ball Jr. '63, MBA '64, has represented the 91st District since 1972. A partner in the Athens law firm of Jones and Ball, he served as prosecuting attorney of Athens County for four years. The Republican lawmaker serves on the Ways and Means, Education, and Transportation committees.

James E. Betts '54 was elected in November to the House from the 3rd District. Staff manager of the Jona-

than Alder Agency of the New England Mutual Life Insurance Co., Cleveland, Betts has long been active in Republican politics. On campus he was president of the senior class, Varsity O and ODK and captain of the basketball team.

Collins

Leonard

Oakley C. Collins '35 has served two terms in the House and is now in his nineteenth year in the Senate. Over the years the Ironton resident has chaired four of the standing Senate committees and at present is a member of the Education and Welfare, Transportation and Local Government, and Health and Retirement committees.

Paul R. Leonard '65, a Democrat, is serving his second term as representative of the 37th District. He is a member of the law firm of Horn, Rife and Leonard in Kettering and an adjunct assistant professor at Wright State University. He serves on three House committees: Judiciary; Interstate Cooperation; and Insurance,

Financial Institutions and Public Utilities.

Pease

Rocco

Don J. Pease '53, MA '55, was elected to the Ohio Senate in 1974 and now serves as vice chairman of the Education and Welfare Committee and as a member of the Ways and Means and Health and Retirement committees. He had earlier served one term in the Senate and three in the House. Active in Oberlin and Lorain County civic affairs, he is editor of the *Oberlin News-Tribune*.

Kenneth A. Rocco '69, a Democrat, was appointed to the 7th District House seat left vacant when Jerome Stano moved to the Senate. Rocco, an attorney, earned his law degree from Case Western Reserve University. A resident of Parma, he has been active in municipal government, serving as a member of City Council.

Theodore R. Boring, clerk of the House, and William H. Chavanne, clerk of the Senate, also attended Ohio University.

ATTENTION BAND ALUMNI!

The Ohio University Band Alumni Association will hold an organizational meeting on campus Saturday, May 10, 1975. All band alumni are encouraged to return the slip below and to come to the meeting.

CAMPUS NOT FIDDLING WHILE ENERGY BURNS

Condensed from OUTLOOK, an Ohio University publication for faculty, staff and students

When Southeastern Ohio's weather follows its usual pattern for February and fluctuates from winter to spring in 24 hours, it costs money, results in energy waste, and causes grey hairs for those responsible for the use of utilities at Ohio University.

The management of utilities on a sprawling campus is big business and it takes a big bite out of the operating and dormitory budgets. The cost of coal, electricity, natural gas and water will be over \$2.3 million for the current fiscal year, up 33 per cent over last year.

The power and the problem

Coal and the heating plant illustrate the University's dilemma. The heating plant burns an average 70 tons of coal a day. In January, 1974 the price of coal was \$9.80 per ton. Today the cost is \$26.99. This works out to a 175 per cent increase, or an extra \$1200 a day.

To cut down the consumption of coal with a central heating plant is a complicated procedure. Although a central plant is much more efficient than each building having its own boiler there are built-in limitations. Pressure in the five miles of steam tunnels must be kept high enough to serve the end-of-the-line building. Heat waste in buildings along the way simply requires the generation of more steam and use of more coal.

There are also limitations on quick response to weather fluctuations. Gear-up and shut-down requirements take at least 24 hours either way and are costly. This prevents altering steam production to correspond with temperature changes.

In the newer and remodeled buildings, heat can be controlled and thermostats set to keep the temperature at 68 degrees. But in the older buildings, the level of heat depends upon individuals who remember, or fail to remember, to outfit the weather by regulating steam radiators before opening windows.

But heat conservation measures have been implemented, and for the first six months of the fiscal year have cut coal consumption by 2,000 tons, avoiding an additional \$54,000 deficit. Equipment has been repaired, controls cleaned and calibrated, and night cycle thermostats installed which will take over automatically in the evening to lower temperatures to 60 degrees.

University Utility Costs for 1974-75

Utility	Projected Cost	% of Total Bill	% Rate Increase
Electricity	\$1,210,000	50.7%	40%
Coal	637,000	26.7%	175%
Water	283,000	11.9%	30%
Natural Gas	256,000	10.7%	30%
Totals	\$2,386,000	100%	

A central environmental control service has been requested as a 1975-77 capital improvement. If this \$330,000 expenditure is approved (which would not affect budget appropriations), central monitoring equipment at the heating plant would control heat or air conditioning throughout the system. The computerized panel would even report malfunctioning equipment.

Under Pressure

Although 40 per cent of the buildings on campus are heated by natural gas rather than coal, the recent curtailment on gas usage will affect only three non-residential facilities. For these, however, the controls will be stringent. Clipping Laboratory, the Administrative Annex and Bush Airport fall into the category which must reduce consumption by 40 per cent for the months of November through March. From April through October the curtailment will be 15 per cent.

These buildings have had their daytime temperature lowered to 66 degrees in classrooms, laboratories and offices. A maximum of 60 degrees will be maintained in foyers and hallways and throughout the buildings at night.

The penalty for exceeding the gas allocations, which necessitates the cut in consumption, is drastic.

Imposed by the Columbia Gas Company, the penalty provision for gas used in excess of the allotment will be \$10 per 1,000 cubic feet. This is an almost 900 per cent increase over the normal rate of \$1.11.

Faced with such penalties, the University will install automatic night cycle temperature systems where feasible and will have gas meters read daily to monitor the effectiveness of control measures. Routine conservation measures will be to keep window drapes and blinds closed when spaces are not occupied and to keep exterior and stairwell doors closed.

Costs short-circuited

Electricity is the biggest item by far in the University's total utilities bill. Since the University no longer generates any of its own electricity, all electrical power is purchased, and the cost for this fiscal year is projected to be about \$1.2 million. This does not include the 12 per cent increase now being sought by Columbus and Southern Ohio Electric.

It is in the use of electricity that conservation relies most heavily on a cooperative effort throughout the campus. Conservation measures administered by the physical plant staff lowered consumption 7.7 per cent in the first half of the fiscal year. This amount of saved electricity corresponds to the amount required for the entire East Green, fully occupied, for six months.

Despite the "ifs" involved, the conservation and curtailment of utilities can produce substantial savings. The initial cutbacks in consumption demonstrate this. But the real difficulty will undoubtedly be the constant effort required. It is no longer a matter of running harder to stay in place; it's now the universal problem of achieving a decline in the rate of increase.

110 Con Brio!

WICA: Change Is the Name of the Game

There's a whole new ball game for women's intercollegiate athletics, thanks to Title IX of the Education Benefits Act.

This legislation mandating equal opportunity for all in any "education program or activity receiving federal financial assistance" has meant — and will continue to mean — adjustments on the part of both men's and women's athletic departments in the nation's universities and colleges.

Barbara Berry, Ohio University's coordinator of women's intercollegiate athletics (WICA), thinks the University has gotten something of a head-start on mastering the rules of the new game — at least when compared to other Ohio and MAC schools.

Last year Miss Berry became the first full-time WICA coordinator in the school's history and the first to assume such a post among Ohio's state schools. This fall she was joined in the Athletic Department by two other coaches, Nancy Schaub (volleyball and basketball) and Sharon O'Meara (swimming).

Coach for the lacrosse team is Catherine Brown '69, MEd '70, an assistant professor in the School of Health, Physical Education and Recreation, which has traditionally been the source of volunteer coaches for women's teams.

Another Ohio University first was the awarding this year of 15 special talent grants to promising women

athletes. The 10 freshmen and 5 upperclassmen were chosen on the basis of recommendations from their high school and university coaches and on the strength of data submitted by the women themselves.

Money often accompanies rising status, and the WICA budget enjoyed a 167 per cent increase between 1973 and 1974 and is expected to see further growth as the women's sports program develops. It remains, however, under \$50,000, including staff salaries.

Miss Berry notes other "good faith" moves on the University's part, among them the fact that WICA women now have a permanent locker room facility in the Convocation Center and have won the expressed acceptance and cooperation of the men's intercollegiate athletics staff.

"We're also getting more pre-game publicity, more spectators, more favorable comments," Coach Berry noted. "And we have been both surprised and pleased by the large number of inquiries from high school women about our program and the special talent awards."

This September a preseason training program was initiated for women athletes and brought 39 women to campus for a start on conditioning before the opening of the fall sports season. For four hours per day the women participated in practice sessions for the volleyball, field hockey and swimming teams.

Again at Christmas, 20 women returned early to Athens to begin basketball workouts. The women, who paid for the program themselves, worked on fundamentals and game strategies in preparation for their 15 game season.

Although the day of men and women on the same University team is yet to come, practice schedules for sports such as tennis and swimming do overlap. Men's swim coach, Fletch Gilders, has been helpful in giving pointers to women divers, according to Berry. Cooperation between the men's and women's tennis teams and their coaches is also well established.

The new emphasis on WICA presents women athletic directors and their staffs with problems as well as opportunities, Miss Berry believes.

"We are well aware of the difficulties men have faced with recruiting and the pressures to produce winning teams. But most of all we know that change in women's athletics has come quickly and we worry that in responding to events we may make errors and lose sight of those we are attempting to serve."

Asked to sum up her view of where WICA is heading, Berry said: "Right now I'm optimistic that at Ohio University we can develop programs that will give women athletes experience with tough competition without being highly pressured and frustrated."

First Year for Coach Bandy

One thing in common between present Ohio University basketball coach Dale Bandy '61 and former coach Jim Snyder '41 few would guess:

Both started out to major in engineering, although each soon switched to physical education and became interested in coaching.

Bandy, who captained Snyder's and Ohio's first MAC Championship team in 1959-60, took the reins when Snyder laid them aside at the end of 1973-74 after 26 years and seven league championships.

It was an older brother who had been an engineering graduate of OU who influenced Bandy to try engineering.

"But I didn't care for it and changed to physical education. Then when I was finishing work on my degree and student teaching, Bob Wren [OU's baseball coach for 24 years] let me coach the freshman team. I enjoyed the experience and decided to enter coaching.

"Actually, in college I think I was a better baseball than basketball player," Bandy said. He won three baseball letters at Ohio and coached baseball as well as basketball later at his hometown high school in Portsmouth.

Bandy's high school coaching days ended when Jim Snyder offered him the basketball opportunity at OU.

"As an assistant the first three years I was mainly concerned with recruit-

ing and scouting, which meant that a great deal of my time was spent on the road," Bandy said.

"When Kermit Blosser left basketball to devote full time to coaching golf in 1966, I became top aide. I also coached the freshman team for about three years and this gave me valuable bench-coaching experience.

"I enjoy all aspects of the job — both on-the-floor coaching and the public relations that are a part of dealing with alumni and friends, and we plan to do more in this area.

"I do miss the scouting and recruiting on the road, but I have personally seen 15 of our top 20 prospects in action," he said.

Bandy recently told a booster club that the difference between an assistant coach and a head coach was "the difference between making suggestions and making decisions," a quote picked up by *Sports Illustrated*.

"The most challenging part of my job," Bandy said, "is dealing with complex young men. It's a challenge to work with 15 individuals and mold them into a unit.

"I'm dedicated to building a program both students and alumni can be proud of. We'd love to crack the top 20 some day. I think it would be good for the University and for the MAC, and I think we can do it."

Coach Bill Hess presents Most Valuable Player awards for the 1974 football season to quarterback Rich Berly, the outstanding offensive player, and tackle Roger Koepfle, the outstanding defensive player.

SPORTS NOTES

With six games left on the schedule, Dale Bandy's Bobcats are out of the MAC race, with a 4-6 record in the conference and 10-10 over all.

Bright spot of the season came on Jan. 22, when junior guard Walter Luckett broke Gerald McKee's 1966-69 school scoring record of 1,310. Luckett has 1,454 points, with the rest of the season and his senior year ahead.

Runner-up to Luckett's 24.3 p.g.a. is Scott Love's 13.6. George Green, finishing out his career for Ohio, leads in rebounds with 188 and has a 12.9 p.g.a.

Coach Nancy Schaub's WICA basketball team has a 6-4 record. High scorers for the women are senior Julie Cole with 11.2 points per game, and Mary Ann Stocker with 8.4.

After a tough schedule of meets, the swimming team, led by Coach Fletch Gilders, holds a 2-12 record. The conference championships are set for March 6-8 at Central Michigan.

In wrestling, Harry Houska's men moved into the conference championships 6-0 against MAC opponents and 11-4 for the season. Dates for the MAC championships are Feb. 28-March 1 at Kent State.

High scorer for the hockey squad is captain Brian Heggie with 15 goals and 7 assists. The squad's record is 9-11.
